

How to make  
a paper laptop

1. Think about  
who you would  
talk to on the  
internet.

2. Fold the  
black paper in  
half like a  
book.

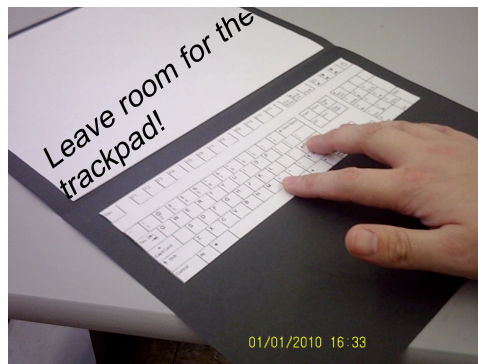

3. Put glue  
around the  
edges of the  
large white  
paper.

4. Glue the  
white paper to  
the top half of  
the black paper.

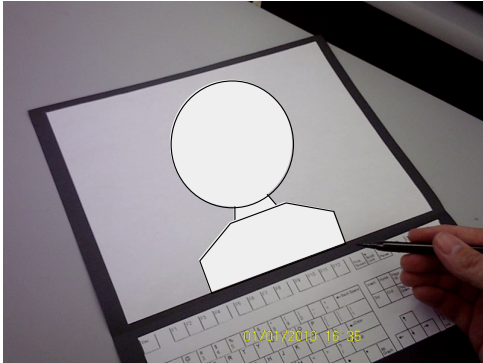

5. Glue the  
keyboard paper  
to the bottom half  
of the black  
paper.

6. Draw the  
person you'd talk  
to over the  
internet on your  
screen.

6b. (This part can  
be done while  
you're waiting for  
the glue. No sitting  
doing nothing!)

7. Add as many details as you can. Don't forget to draw what's behind them!

8. Put your name and your classroom teacher's name on the lower half near the keyboard.
